Open Post-Study Work Visa | Full New Zealand work rights until 25 March 2029

Professional Summary

Technology Innovation in Business graduate (Distinction) with an Accounting degree, a 400-hour academic technology internship and freelance Uyghur speech-data work with LILT. Experience in requirements, prototyping, interface review, issue identification and documentation. Seeking graduate or junior opportunities in AI data quality, product support, business systems, implementation support or project coordination.

Core Skills

Quality and Coordination: transcription quality checks; issue identification; review of revisions; progress records; team communication; stakeholder feedback; reports and presentations

Product and Requirements: requirements clarification; user flows; interaction design; platform comparison; prototyping; interface and content review

Data and Administration: structured records; Microsoft Excel; sorting and filtering; basic formulas; quality checks; Microsoft 365

Professional Experience

Uyghur Speech Data Contributor (Freelance Contractor) | LILT | Remote | Jul 2026 - Present

Passed LILT's audio and transcription vetting for a multilingual speech-data collection project.

- Complete Uyghur audio-recording, Arabic-script transcription and quality-control tasks against project and language-specific guidance.
- Work independently in a remote, task-based workflow, following updated instructions and quality requirements.

Technology Innovation Internship (Academic Project) | University of Waikato | Nov 2025 - Feb 2026

Completed approximately 400 hours in a student-led technology project, delivering an interactive cultural storytelling prototype, final report and presentation on schedule.

- Designed and refined puzzle interactions following team feedback; adjusted Wix layouts and content; contributed to AI-generated narration, progress reports and presentations. Worked within a team responsible for the wider storytelling experience.

Education

University of Waikato, New Zealand - Master of Technology Innovation in Business, Distinction | 2025 - 2026

Dalian Jiaotong University, China - Bachelor of Management (Accounting) | 2020 - 2024

Selected Projects

Career Command Center - Bilingual Job Application Tracker | Jun 2026 - Present

Defined record fields, status workflows and UI requirements for an AI-assisted application. Used Codex for code implementation; reviewed search, filtering and record-management behaviour, identified problems and requested corrections.

Ana Tilim & Uyghur Tili - Dual-Edition Uyghur Language Learning Platform | Jul 2026 - Present

Organised multilingual learning content and UI requirements. Used Codex for implementation; reviewed learning flows and content presentation, identified missing details and layout issues, and checked requested changes.

Harry Potter Knowledge Assistant | COMPX500 Academic Project | 2025

Explored knowledge organisation, assistant persona and response constraints, and compared cloud and local approaches. Used AI-assisted coding; reviewed response behaviour and identified retrieval and answer-consistency limitations.

Tools and Working Methods

Personal Projects: originate ideas; define requirements and interface direction; identify issues; request corrections and review results. Codex supports code implementation and automated checks.

Productivity and Design: Microsoft Excel and Microsoft 365; Figma; Miro; Wix; Canva; Proto.io; reports and presentations.

AI Applications: Codex and ChatGPT for assisted prototyping and iteration; multilingual speech-data recording, transcription and quality review.

Additional Information

Languages: Uyghur - native or bilingual; Mandarin Chinese - native; English - professional working proficiency.
Student leadership: campus event coordination and liaison support for ethnic-minority students.

Auckland-based; full New Zealand driver licence; available immediately. Open to domestic and international business travel while remaining Auckland-based.
