

Nicole Nikareayi

GRADUATE BUSINESS ANALYST | BUSINESS SYSTEMS, DATA & IMPLEMENTATION

Auckland, New Zealand | nigaray703@gmail.com | [linkedin.com/in/nikareayi-aisikaer](https://www.linkedin.com/in/nikareayi-aisikaer) | github.com/nigaray703-ops
Open Post-Study Work Visa | Full New Zealand work rights until 25 March 2029

PROFESSIONAL SUMMARY

Graduate business systems and technology professional with a Master of Technology Innovation in Business (Distinction) and practical experience across an approximately 400-hour academic internship, requirements and process analysis, application testing, data organisation, stakeholder documentation and privacy-conscious digital products.

Combines business, systems, data, AI and user-centred design capability. Targeting graduate and junior opportunities across business analysis, business systems, implementation, application support, data quality, reporting and continuous improvement.

CORE CAPABILITIES

Business analysis: requirements, user stories, process and workflow mapping, gap and option analysis. Systems and implementation: solution evaluation, testing, issue tracking, user guidance and documentation. Data and reporting: collection, cleaning, validation, reconciliation, Excel analysis, dashboards and structured records. Improvement: user research, accessibility testing, feedback synthesis and workflow refinement.

PROFESSIONAL EXPERIENCE

Technology Innovation Intern - Business Analysis and Digital Delivery | University of Waikato | Academic, A+ | Nov 2025 - Feb 2026 | Approximately 400 hours

- Helped a student team deliver Ko ahau te awa, an interactive cultural storytelling prototype combining a map, puzzle interaction, responsive layouts and optional audio narration.
- Translated project goals and feedback into user journeys, interaction flows, functional requirements and structured delivery tasks; owned the puzzle interaction from concept through refinement.
- Compared Wix and Canva constraints, supported responsive Wix implementation across desktop and mobile, and applied clarity, accessibility and cognitive-load principles.
- Supported testing, issue identification and repeated correction; maintained project records and helped deliver the final prototype, report and presentation on schedule.

SELECTED BUSINESS SYSTEMS PROJECTS

Career Command Center - Bilingual Job Application Tracker | Independent project | Jun 2026 - Present

- Defined business rules, data fields, status categories, workflows and information architecture for centralising applications, candidate portals and follow-up information.
- Built dashboard metrics, conversion indicators, search, A-Z navigation, filtering, sorting, grouping and responsive record management.
- Implemented Google authentication and user-scoped Supabase access for the private version; separated the public demo with fictional records, simulated sign-in and disabled cloud access.

Ana Tilim - Mobile-First Uyghur Language Learning Platform | Independent project | Jul 2026 - Present

- Structured multilingual curriculum and course data for Uyghur script, ULY transliteration, vocabulary, grammar, practice activities and reading content.
- Implemented RTL support, human-recorded audio, listening and dictation, offline progress, backup and restore, plus UID-scoped Supabase synchronisation with Row Level Security.
- Created a verification runner covering course-data integrity, transliteration, audio manifests, interactions, authentication, cloud sync and full-content rendering across 464 interface states.

SELECTED DATA AND APPLICATION PROJECTS

Harry Potter Knowledge Assistant - Curated AI Dataset | COMPX500 | A+ | *Aug 2025 - Sep 2025*

- Collected and integrated data from Wikipedia, Kaggle and Fandom using Python, BeautifulSoup, Pandas, Google Colab and Jupyter Notebook.
- Cleaned schemas, removed duplicates, managed aliases, linked subjects and expanded the validated dataset to 16,245 rows.
- Packaged a constrained upload bundle with a manifest and validation checks; designed source-aware, off-topic and uncertainty handling and compared cloud/local model results.

Cash Safety Assistant - Personal Finance Planning Web App | Independent project | *Jun 2026 - Present*

- Translated cash-planning needs into editable profile and transaction models, recurring costs, income, safety thresholds and projected balances.
- Implemented Firebase Authentication and UID-scoped Firestore storage, with a local Demo mode and explicit separation between local and authenticated cloud states.
- Delivered a responsive Progressive Web App and a separate local SwiftUI companion prototype with JSON-backed on-device persistence.

LEADERSHIP AND COMMUNITY

Arts Committee Chair | Dalian Jiaotong University | *Mar 2021 - Sep 2023*

- Planned campus events with 100+ participants and coordinated cross-functional teams across departments and student groups.

Ethnic Minority Liaison | Dalian Jiaotong University | *Sep 2020 - Jul 2024*

- Supported communication and coordination for 30+ students and maintained structured records.

EDUCATION

Master of Technology Innovation in Business - Distinction | University of Waikato, New Zealand | *2025 - 2026*

Bachelor of Management (Accounting) | Dalian Jiaotong University, China | *2020 - 2024*

TOOLS AND TECHNICAL SKILLS

Analysis and reporting: requirements analysis, process maps, functional specifications, test support, Excel cleaning, formulas, lookups, pivot tables, validation, reconciliation and dashboard metrics. Product and web: Figma, Miro, Wix, HTML, CSS, JavaScript, PWA, Electron, SwiftUI prototypes, Firebase, Firestore, Supabase and RLS. AI and data: Python, Pandas, Jupyter, Google Colab, BeautifulSoup, curated datasets and cloud/local LLM evaluation. Tools: Microsoft 365, GitHub, Jira and Confluence (basic), SQL and Power BI (foundational).

LANGUAGES

Uyghur - native | Mandarin Chinese - native | English - professional working proficiency | Korean - basic conversational | Te Reo Maori - introductory
