

Nicole Nikareayi

GRADUATE BUSINESS ANALYST | BUSINESS SYSTEMS, DATA & IMPLEMENTATION

Auckland, New Zealand | nigaray703@gmail.com | [linkedin.com/in/nikareayi-aisikaer](https://www.linkedin.com/in/nikareayi-aisikaer) | github.com/nigaray703-ops
Open Post-Study Work Visa | Full New Zealand work rights until 25 March 2029

PROFESSIONAL SUMMARY

Master of Technology Innovation in Business graduate with Distinction and practical experience translating stakeholder needs into requirements, workflows, structured data, prototypes and functional digital products. Brings hands-on experience in platform evaluation, testing, documentation, data organisation and iterative process improvement across internship, academic and independently built projects.

Targeting graduate and junior opportunities across business analysis, business systems, application support, implementation coordination, functional consulting, master data, data quality, reporting and continuous improvement.

CORE CAPABILITIES

Business analysis: requirements gathering, stakeholder communication, process mapping, gap analysis, user stories and functional requirements. Systems and implementation: platform evaluation, workflow modelling, testing coordination, feedback triage and documentation. Data and reporting: data cleaning, validation, structured records, lookups, pivot tables and dashboard design. Improvement: issue identification, workflow optimisation and iterative refinement.

PROFESSIONAL EXPERIENCE

Technology Innovation Intern - Business Analysis and Digital Delivery | University of Waikato (STEMX500) | Nov 2025 - Feb 2026 | 400+ hours

- Translated project objectives and stakeholder needs into user journeys, interaction flows and functional requirements for an interactive cultural storytelling experience.
- Built and refined a responsive Wix prototype across desktop and mobile, using structured platform evaluation to resolve implementation constraints.
- Applied usability and accessibility principles, including clarity-first interaction, cognitive-load reduction and intuitive navigation.
- Coordinated testing, feedback synthesis and iterative refinement; delivered the final prototype, documentation and presentation.

SELECTED DIGITAL PROJECTS

Career Command Center - Bilingual Job Application Tracker | Independent project | Jun 2026 - Present

- Defined requirements, workflow stages, status categories and information architecture for managing job applications and follow-up actions.
- Designed dashboard analytics, filtering, sorting and structured records; implemented local backup, restore and privacy-safe demo data.
- Iteratively tested and refined the responsive interface using real-world workflow needs.

Cash Safety Assistant - Personal Finance Planning Web App | Independent project | Jun 2026 - Present

- Defined a mobile-first cash-planning workflow covering income, recurring expenses, estimated utilities and projected balances.
- Designed the responsive dashboard and implemented Firebase Authentication, private Firestore synchronisation and a public Demo mode.

SELECTED UNIVERSITY PROJECTS

PawPal Health - AI-enabled Dog Wellbeing Concept | University of Waikato (COMPX500) | *Sep 2025 - Oct 2025*

- Translated pet-owner needs into feature requirements for activity tracking, symptom monitoring, wellbeing insights and AI-assisted feedback.
- Designed a dashboard that presents behavioural and physiological information clearly and created interactive prototype screens in Proto.io.
- Presented the product concept, user value, design rationale and innovation opportunity.

GlobeMate - Personalised Travel Planning Concept | University of Waikato (MNMGT544) | *Jul 2025 - Oct 2025*

- Conducted market research and customer segmentation for a travel concept combining weather insight, budget estimation and memory mapping.
- Shaped feature logic and the value proposition, contributing to business-case development and concept validation in a multidisciplinary team.

LEADERSHIP AND COMMUNITY

Arts Committee Chair | Dalian Jiaotong University | *Mar 2021 - Sep 2023*

- Planned campus events with 100+ participants and coordinated cross-functional teams across departments and student groups.

Ethnic Minority Liaison | Dalian Jiaotong University | *Sep 2020 - Jul 2024*

- Supported communication and coordination for 30+ students and maintained structured records.

EDUCATION

Master of Technology Innovation in Business - Distinction | University of Waikato, New Zealand | *Feb 2025 - Feb 2026*

Bachelor of Management (Accounting) | Dalian Jiaotong University, China | *Sep 2020 - Jul 2024*

TOOLS AND TECHNICAL SKILLS

Business systems and data: Excel data cleaning, sorting, filtering, basic formulas, lookup functions and pivot tables; Word documentation; PowerPoint reporting and presentations. Analysis and design: Figma, Miro, Proto.io, Wix, Jira and Confluence (basic exposure). Web and data tools: HTML, CSS, JavaScript, Firebase, Firestore, GitHub, basic Python and Jupyter Notebook.
